2:05 - 2:20	Break	
2:20 - 3:00	Closing Activity	Event Center

Session Descriptions:

Using AI in the Adult Ed Classroom

Fox Room 101 - Francisco Pinedo - OTAN

Fox Room 102 - Mark Branom - SJCC

This session will introduce participants to how AI can be a tool to provide access and equity to the adult learner. Whether you have some students making use of AI, and you want to proactively approach engaging with your classroom, or you are curious about how you might leverage this emerging technology to benefit your work, AI's role in adult education is being cemented day by day.

Beyond the Student Panel: What comes next?

Fox Room 107 - Traci Williams - ESAE & Dr. Maniphone Dickerson - SJCC

Morning session only

Following the Student Panel, the SBCAE Co-chairs will facilitate a group discussion / reflection on what we as educators can take away to improve our practice and services.

Tech Tools and Insights for DEIBA in Adult Education

Fox Room 107 - Dr. Veronica Parker - OTAN

Afternoon session only

This thought-provoking session will unravel the layers of Diversity, Equity, Inclusion, Belonging and Access (DEIB) in the context of adult education.

Open Education Resources (OERs)

Fox Room 201 - Penny Pearson - OTAN

An introduction to the value of Open Education Resources (OER) for both learners and agencies. OER offers agencies the ability to provide rich educational materials at no, or low cost and are generously licensed to allow for revision, remixing and redistribution. For learners, OER's can provide additional support, or equivalent learning opportunities, typically at no cost. Additionally, the use of OER can contribute to educational equity, diversity, and inclusion in classrooms. Properly identified OERs can support Anti-Racist teaching practices and give students a sense of belonging while supporting steps toward closing equity gaps.

An Overview of Regional Student Outcome Equity Data

Fox Room 202 - Rick Abare - SBCAE

This session will explore SBCAE regional student data to examine student outcomes through an equity framework as a method for highlighting possible gaps in our collective impact.
